How to use Office Password Recovery Magic

Office Password Recovery Magic is totally an easy-to-use application. The concise interface is easy for users to understand. No complicated buttons confuse users. Users can just follow the steps below to recover password easily.

1. Start the program, Office Password Recovery Magic
2. Click "Open" button to load the locked file.
3. Click "Setting" button to set desired parameters.

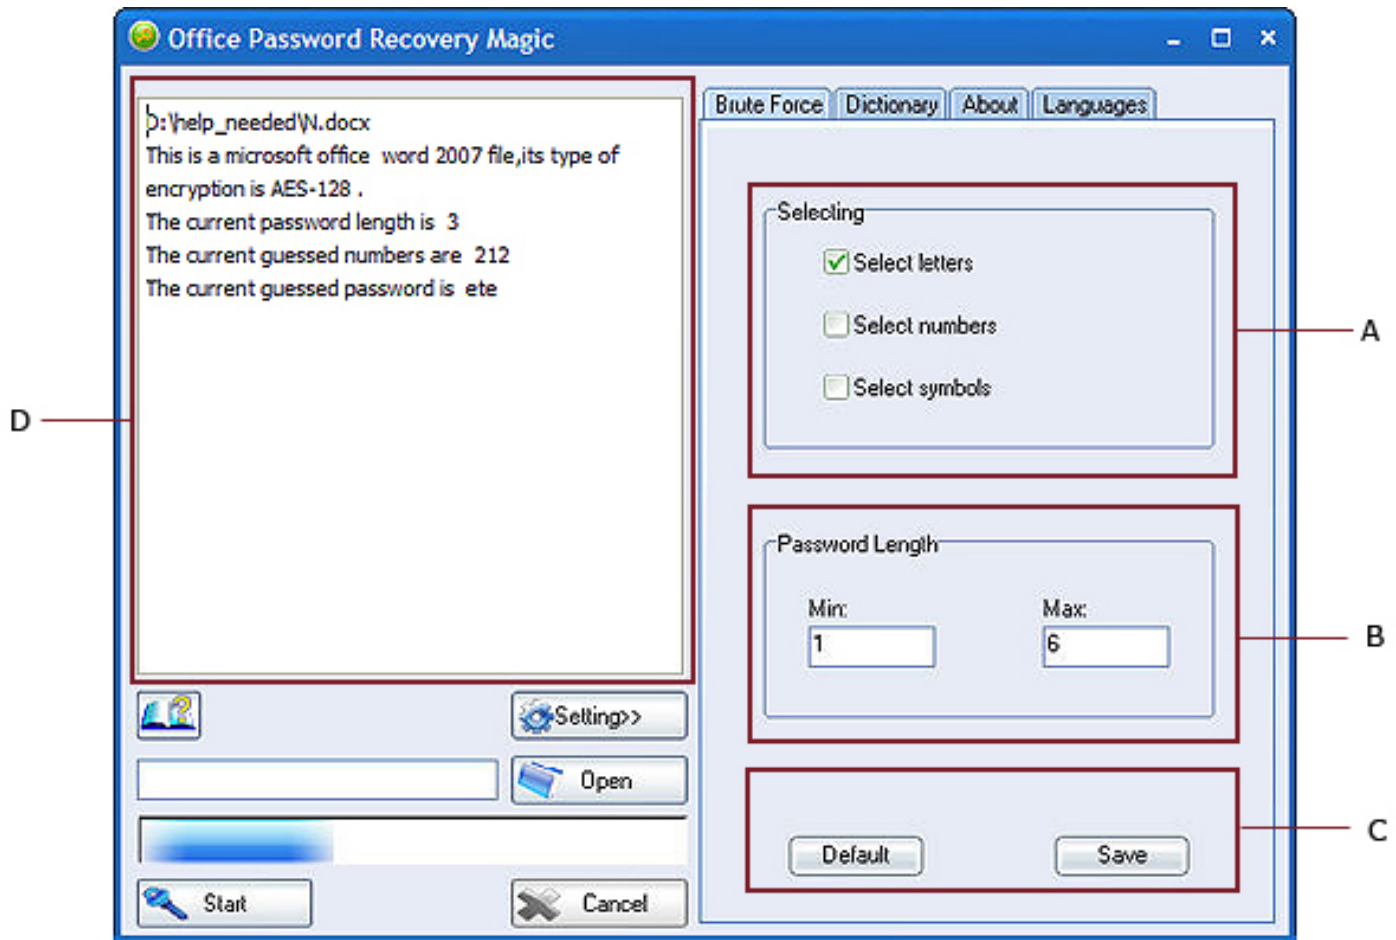

"Brute Force" - Input the aware information about password, such as the length and shape.
"Dictionary" - Load a text to focus the range of password in these letters.

4. Click "Start" button to begin recovering password.

Office Password Recovery Magic

Brute Force

"Brute Force" is an intelligent recovery function• You can set the parameters to speedup the recovery process.

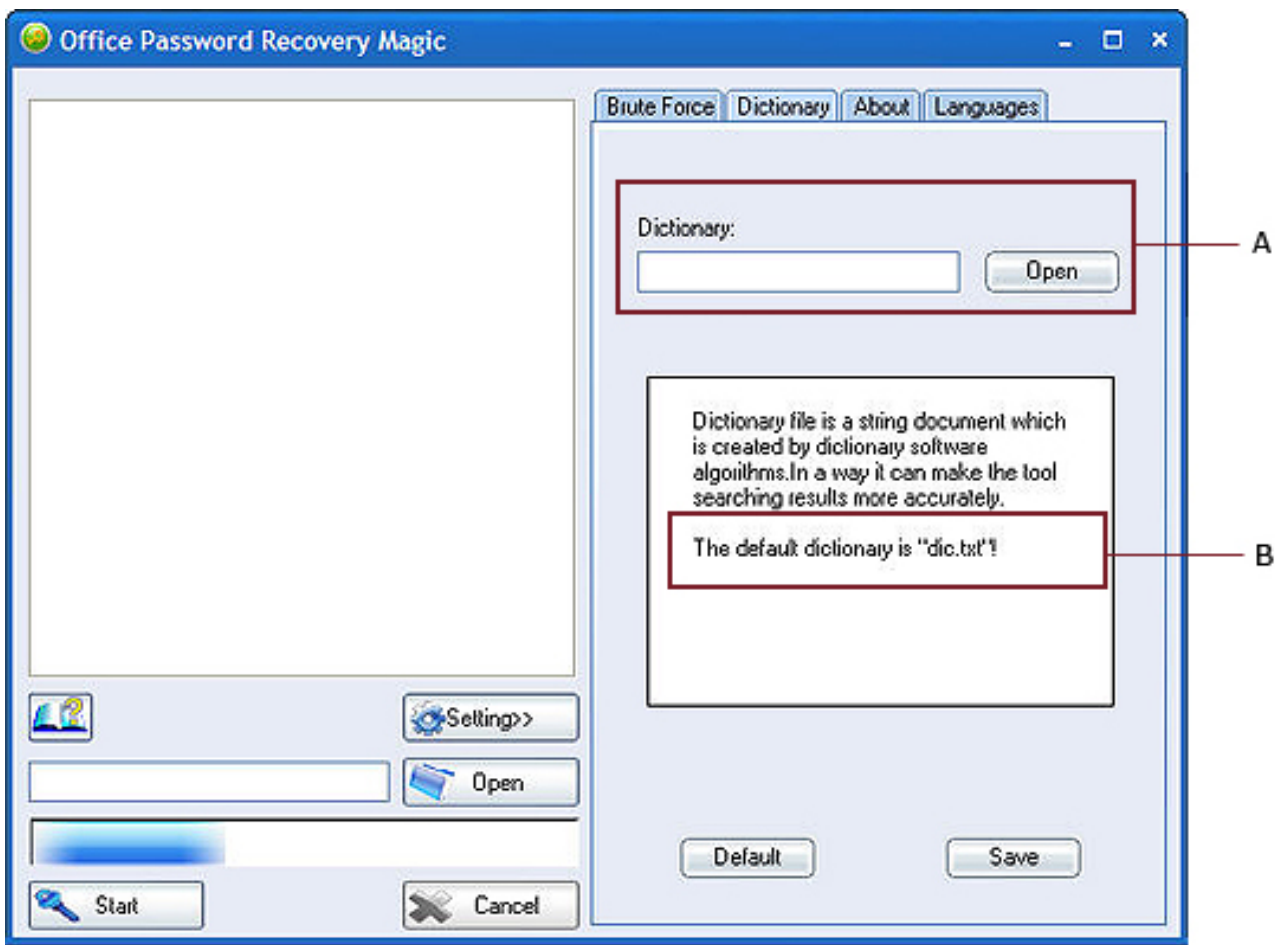

A. Tick the buttons to select password's shape. If you think it was composed by letters, you would tick the front button. When you don't have any information, just tick them all. (This is not suggested doing, because the more shape you select, the longer time you need waiting.)

B. Set the range of the password's length to exact the password more quickly.

C. After finishing the settings, click "Save" to perform the parameters as you set. Or just click "Default" to perform as it does.

D. After clicking start button, all related file information will show in this blank window.

Dictionary

A. Add dictionary files to recover password.

B. The files information will be showed here. After adding the files, the path will also be showed here. (The default dictionary files' format is "*.txt").

After finishing setting, Office Password Recovery Magic will find password from the loaded file.
